Part of Warrington Primary Academy Trust | Together We Forge Our Tomorrows

**Dear Parent / Carer,**

We have partnered up with Complete Maths to be able to bring **FREE** mathematics tutoring to every child over the summer holidays. This is an ideal opportunity to ensure that your child is mathematically ready for the next academic year, and the tutoring can be accessed 24/7, completely at your convenience.

## **Every child has the potential to be successful in mathematics**

When a child can think mathematically — problem solve, embrace a challenge, connect ideas — it will permanently improve their life chances. Every child deserves the best support to help them become more mathematical. Ditton Primary School is committed to improving the mathematical ability of our pupils, above and beyond the grades they get.

## **25% of UK children have a private tutor**

Private tuition is seen as the gold standard, but it's out of reach for many families, costing a bare minimum of around £15 / hour, but for a subject expert is more often £35 - £70 / hour. Surveys tell us that many UK families can only afford complementary education if it costs no more than £1 per week.

## **And that is why we would like to introduce you to 'Complete Mathematics TUTOR'**

Available 24/7, but delivered virtually by expert maths teachers and mapped against the most comprehensive maths curriculum in the world, each child follows a unique course based on their individual strengths, and the areas of maths that they find the most challenging.

What's more, TUTOR constantly learns from children's work and uncovers underlying knowledge they have not yet secured which will hold them back, and can then deliver hyper-targeted tuition on that point of maths.

They can choose when they work, and for how long, offering them flexibility and autonomy over their own learning. They are rewarded for both progress and effort — we want them to feel motivated to keep going — but they don't move on until they are comfortable.

## **The Offer**

TUTOR will be released in full in September, ready for pupils to start their journey as soon as they return to school. But the team at Complete Mathematics don't want pupils to miss out on the opportunity to access the learning materials they already have ready to go, which is why they have created a unique Summer School to bridge the gap between now and September.

Summer School will allow pupils to sign up to any number of structured online courses, delivered by the same experienced teachers as the TUTOR programme.

The Complete Mathematics team is offering Summer School **for free**, to **all pupils** because after the challenges schools have faced over the last 15 months, they believe it's the right thing to do.

Attached to this letter are step-by-step details of how to access TUTOR to begin specialised maths tutoring immediately!
